## SUMMARY

Front-end / full-stack developer and UI/UX designer with a strong focus on React and a technical background in computer networks. I build and maintain web applications, websites and system integrations end to end, from interface design to APIs, automations, hosting and DNS. I use AI-assisted development tools in my daily workflow and have built several award-winning hackathon products, including AI-powered ones, with React, React Native and Node.js. Comfortable working close to infrastructure and hardware, and eager to grow in an international team. Completing a degree in Systems Analysis and Development (expected mid-2027).

## EDUCATION

*2026 - mid-2027 (expected)* - **Technologist Degree in Systems Analysis and Development** - Faculdade Nova Roma
*2024 - 2026* - **Computer Science (undergraduate studies, transferred to current degree)** - UniFBV Wyden
*2021 - 2023* - **Technical High School Diploma in Computer Networks** - ETEMERB

## LANGUAGES

**Portuguese** - Native

**English –** Advanced (C1) – *EF SET English Certificate*, 2025

## EXPERIENCE

**Digital Solutions Developer, SELVA Agency** - May 2025 – Present (remote)

- *Build, support and continuously improve websites and web applications on WordPress, Webflow and Wix, writing custom HTML, CSS and JavaScript. Design landing pages, online stores and digital ecosystems focused on performance, usability and conversion rates. Manage system integrations through APIs, webhooks and automated workflows using HubSpot, ActiveCampaign, RD Station CRM, WooCommerce, n8n and Bling, keeping data, contacts and transactions consistent across tools. Responsible for the technical setup of hosting servers, domains, corporate email accounts and DNS. Work closely with the design and growth teams to deliver technical improvements, streamline internal processes and build solutions that boost the agency's productivity and clients' results.*

## ACADEMIC EXPERIENCE

**Teaching Assistant – Introduction to Structured Programming, UniFBV Wyden** - Aug 2024 – Dec 2024

- *Supported students with the fundamentals of structured programming, programming logic and the C language, reinforcing core concepts of the Computer Science program.*

## PROJECTS

**Ágora** – Networking Platform for Artists

*Feb 2025 – Nov 2025*

Winner of the Hedera HelloFuture 2024 Hackathon and accepted into pre-incubation at PoloTec UFPE. A networking platform for the entertainment, arts and culture sector that connects artists, producers and industry agents through AI- and machine-learning-powered matchmaking, supporting artists from first connections and training to community building and funding applications.

**(UI Designer, Visual Identity Creator and Front-end Developer · React / React Native & Node.js)**

**Munganga** – AI-Powered Programming Learning Platform

*Aug 2024 – Dec 2025*

Edtech startup founded at UniFBV Wyden. We built a gamified, AI-powered platform that teaches programming logic and computational thinking. I was co-founder, UI/UX designer and front-end developer. The platform was showcased at Rec'n'Play 2024.

**(Co-founder, UX/UI Designer, Visual Identity Creator and Front-end Developer · React / React Native & Node.js)**

🔗 GitHub | Behance

**Copiba** – Sustainability & Gamification App

*Feb 2025 – Mar 2025*

Social and environmental impact app that rewards sustainable actions with virtual coins (Capibas) and uses AI to estimate $CO_2$ savings. Built for the Hacker Cidadão 12.0 hackathon, where it won 2nd place.

**(UX/UI Designer, Visual Identity Creator and Front-end Developer · React / React Native & Node.js)**

🔗 GitHub | Behance

**Skill Sphere** – Skills & Learning Path Management Platform

*Dec 2024*

System for organizing and managing online and in-person events and competitions, covering planning, registration, tracking and participant evaluation, with a focus on user experience and flexibility across formats.

(**UX/UI Designer and Visual Identity Creator**)

🔗 GitHub | Behance

**EConecta** – Sustainable Community Engagement Platform

*Nov 2024 – Dec 2024*

App connecting residents and community leaders to encourage sustainable actions in their neighborhoods. Placed 4th at the Conecta Recife hackathon and was praised for its local impact.

(**UI Designer, Visual Identity Creator and Front-end Developer · React / React Native & Node.js**)

🔗 GitHub | Behance

**Nivelo** – Knowledge Leveling App

*Oct 2024*

Built during a low-code hackathon, Nivelo is a self-assessment app that lets students check their level in core subjects such as math, helping schools level their students.

## AWARDS & RECOGNITION

- **GovTech Open Innovation Call** - Recria project approved, ranked 4th out of 34 proposals.
- **Pre-incubation at PoloTec UFPE** - Ágora project accepted for continued development.
- **Hacker Cidadão 12.0** - 2nd place with Copiba, a socio-environmental impact app using AI and gamification.
- **Rec'n'Play 2024** - Munganga selected for presentation at a major innovation and technology festival.
- **Hedera HelloFuture Hackathon 2024** - Winning team with the Ágora project.

## VOLUNTEER WORK

**Volunteer Web Developer, ASP-PE (Parkinson's Association of Pernambuco)** - Jan 2025 – Mar 2025

- Built the new website of ASP-PE, a non-profit that has supported people with Parkinson's and their families in Pernambuco for over 20 years. Developed the responsive front-end with HTML, CSS and JavaScript, with an easy-to-navigate experience for its users.

## TECHNICAL SKILLS

**Front-end:** React • React Native • JavaScript • HTML • CSS • Responsive UI
**Back-end & other:** Node.js • REST APIs & webhooks • PHP • Python • C
**AI & Automation:** AI-assisted development (Claude Code) • Front-ends for AI-powered products • n8n workflow automation
**Design:** UX/UI • Figma • Adobe Creative Suite • Canva
**Platforms & Tools:** WordPress • Webflow • Wix • WooCommerce • HubSpot • Hosting, DNS & computer networks
